

COVID-19 Protection Framework (traffic lights)

The new framework provides a guide to protecting one another, keeping our health system running well and businesses open.

Factors for considering a shift between levels

- vaccination coverage;
- capacity of the health and disability system;
- testing, contact tracing and case management capacity; and
- the transmission of COVID-19 within the community, including its impact on key populations.

Decisions will also include other factors, including economic and social impacts and operational considerations.

Localised protections and lockdowns: can be used as part of the public health response, in addition to other measures, where necessary to protect affected communities.

My Vaccine Pass: the official record of your COVID-19 vaccination status for use in Aotearoa New Zealand.

You will be legally required to provide your Vaccine Pass to enter places that have vaccination requirements in place in order to operate under the current traffic light setting. This may include hospitality venues, events, gatherings, and gyms.

You cannot be asked to provide your Vaccine Pass to access basic needs services, including supermarkets, dairies, petrol stations, public transport, pharmacies and essential health care. This also applies to specific education and housing services.
